Fixed-fleet service outcomes: all preregistered resource points
C00: repaired current-only rule
C10: same-information forecast rule
C11: mixed-domain ranker, fixed seed 29
Conditional synthetic parent 901
Conditional synthetic parent 902
Completed by 59,400 s [bags]
On-time completed by 59,400 s [bags]
Fixed physical fleet N
Fixed physical fleet N
N=22 C00/C10 reuse D; resource C11 always uses mixed_18_22_26, seed 29 (G).
Each line only connects the displayed fleet endpoints; it does not estimate untested fleets.
Two conditional synthetic parents share one historical workload template. Training seeds are repeated fits, not independent airport days.
Failed/missing branches remain absent. These curves do not certify replacement fleets or per-job protection.
